

ABSTRACT OF THE DISCLOSURE

A wall is provided comprising an inner wall component, an outer wall component, and a plurality of the moisture control strips described above, disposed between the inner wall component and the outer wall component. The projections on the first wall component contacting face engage one of the inner wall component and the outer wall component. The second wall component contacting face engages the other of the inner wall component and the outer wall component. The moisture control strips are horizontally spaced from each other within the wall.
